PROFESSIONAL SUMMARY

Generative AI and Backend Developer with 1.5+ years of experience building LLM-powered applications, RAG pipelines, real-time streaming APIs, and AI-driven automation systems. Skilled in Python, LangChain, LangGraph, agent orchestration, MCP, FastAPI, Groq, Hugging Face, and OpenAI APIs, with hands-on experience in vector databases (ChromaDB) and Claude Code CLI. Experienced in designing scalable backend services, building RESTful APIs, and deploying enterprise-grade AI solutions on AWS using Git/GitHub/GitLab workflows.

TECHNICAL SKILLS

- Generative AI / LLM: LangChain, LangGraph, Agent Orchestration, MCP, RAG & Advanced RAG, Prompt Engineering, Groq, Hugging Face, OpenAI APIs, LLM Evaluation
- Backend & APIs: Python, Django, FastAPI, RESTful APIs, Pydantic, Streaming APIs (SSE), Postman, Swagger/OpenAPI
- Data & Storage: PostgreSQL, SQL, ChromaDB, Vector Databases, JSON Data Modeling
- Tools & DevOps: Git, GitHub, GitLab, AWS EC2, Putty, Docker (working knowledge), CI/CD fundamentals, Claude Code CLI
- Testing & QA: Selenium, Test Case & Test Script Automation, Evaluation Frameworks

PROFESSIONAL EXPERIENCE

Generative AI & Backend Developer | Capgemini

Oct 2024 – Present

GenAI Enablement Portal — Financial Services Accounts

- Built and maintained an internal portal to track ongoing GenAI proof-of-concept (POC) and enablement projects across multiple financial-services accounts, giving stakeholders real-time visibility into progress.
- Enabled account teams to raise and manage requests for GenAI activities — demos, training sessions, POCs, and enablement engagements — through a centralized workflow.
- Designed and developed RESTful APIs in Python/Django with PostgreSQL as the backing data store.
- Managed source control and collaborative development workflows across GitHub repositories.
- Deployed and maintained the application on AWS EC2, handling server access and configuration via Putty.

Test Case & Test Script Generation Framework — Leading UK Bank

Aug 2025 – Feb 2026

- Designed and built an LLM-based framework to auto-generate test cases and test scripts for a major UK banking client, achieving an 80% efficiency gain in test case generation and 70% in test script generation.
- Developed an evaluation matrix to assess output quality, which was adopted across the client's demo, enablement, and training programs.
- Collaborated with cross-functional teams to align generated test artifacts with existing QA and testing standards.
- Iterated on prompt design and evaluation criteria to improve consistency and accuracy of generated outputs.

Quality AI — Agentic Test Automation Platform (In Progress)

- Contributing to Quality AI, a multi-agent web application for automated test case generation, test script generation, and performance testing, including Selenium-based test execution and migration testing support.
- Own the test case generation agent and test script generation agent within a broader agent-orchestration architecture.
- Working with the team to incorporate RAG-based context retrieval to improve agent accuracy on client-specific testing standards.

PERSONAL PROJECTS

HireMe AI — Interactive Candidate AI Avatar & Resume Parser | Personal Project

- Developed an AI-powered candidate assistant using FastAPI, Groq LLaMA 3.3, and Pydantic.
- Implemented real-time streaming responses and resume-based conversational question answering.
- Designed structured JSON outputs for reliable, parseable AI interactions.

EDUCATION

B.E. in Artificial Intelligence & Data Science

2020 – 2024

Dr. D. Y. Patil Institute of Technology

Higher Secondary Certificate (HSC)

La.Na. Hoshing College, Jamkhed

Secondary School Certificate (SSC)

Shri Nagesh Vidyalaya, Jamkhed

2020
